

3R TECHNOLOGY

e-waste recycling and remarketing services

CERTIFICATE OF RECYCLING AND DESTRUCTION

Customer Name / Company: _____

Address: _____

Date of Transaction: _____

Contents of Load: Miscellaneous Electronics (lbs.) – BOL #

This document certifies that the materials received by 3R Technology were handled in conformance with the requirements of the R2 (Responsible Recycling) Standard, relating to environmental, health, safety, and security aspects of electronics recycling.

R2 requires e-recyclers to assure that toxic material streams are managed safely and responsibly by downstream vendors all the way to final disposition. It also prohibits e-recyclers and their downstream vendors from exporting these toxic materials to countries that have enacted laws making their import illegal.

3R Technology is also compliant with the Washington Department of Ecology’s Dangerous Waste Regulations, Chapter 173-303 WAC.

Methods used by 3R Technology and its downstream recyclers to recover component materials assures that all equipment, devices, or products contained in the above documented load(s) were recycled properly, completely, and in an environmentally safe manner conforming to the R2 standard.

Data on computer hard drives, optical and magnetic media was either destroyed through

- Physical Shredding
- Eliminated via software 3-pass binary wipe meeting U.S. DoD 5200.28-STD.

Certified on the ____ day of _____, 20__
